Stud Finder

Biary Innovation Co. offers the Magic-Stud-Finder for carpenters, electricians, contractors and do-it-yourselfers. With XtremeMagnets, it is designed to provide 100 percent accuracy for locating wood and metal studs, without batteries or electronic parts and no faulty readings from pipes, cables and insulation. It locates stud screws and nails, then releases high-impact, plastic-encased XtremeMagnets onto the wall, targeting the location of the stud without having to mark the wall.
